

SHAKTHI SIVAPRAKASH S

AI & Data Science | Python | Data Analysis | Machine Learning | Full Stack

+91 9342919614 | shakthisivaprakash.s09@gmail.com | [linkedin.com/in/shakthi-siva](https://www.linkedin.com/in/shakthi-siva) | Walajapet, Tamil Nadu

PROFESSIONAL SUMMARY

AI and Data Science graduate with hands-on experience in Machine Learning, Deep Learning, Full-Stack AI applications, and data analytics. Built scalable AI solutions including LLM-powered debugging systems and CNN-based computer vision models using React, FastAPI, TensorFlow, and Python. Passionate about building practical AI products and solving real-world problems through intelligent systems.

EDUCATION

B. Tech – Artificial Intelligence & Data Science

Sri Venkateswara College of Technology, Sriperumbudur, India

CGPA: 8.99 / 10 | 240 ECTS | EQF Level 6 Equivalent

Coursework: Data Analytics, Machine Learning, Artificial Intelligence, Statistics, Data Structures

TECHNICAL SKILLS

Languages & Frameworks: Python (Pandas, NumPy), TensorFlow, Keras, FastAPI, React, HTML, CSS

Data & Analytics: Data Cleaning, Statistical Analysis, Data Visualization, Power BI, Tableau

AI / ML: Machine Learning, Deep Learning, CNN, Computer Vision, LLM Integration, Prompt Engineering

Tools & Platforms: MS Office, AWS Cloud, Git, Ollama, PostgreSQL/SQLite

EXPERIENCE

Data Analytics Virtual Intern

Tata Group (Forage) – Virtual

- Completed data cleaning, analysis, and visualization tasks to generate actionable business insights from real datasets.
- Applied Power BI and Tableau for interactive dashboards and presented data-driven recommendations to stakeholders.

Machine Learning Intern

Gradtwin

- On boarding an internship at Gradtwin – Under Machine learning and Various problem solving in Real World scenarios

PROJECTS

Dog vs Cat Image Classification using CNN

- Built a CNN model from scratch on 20,000+ images, performing data preprocessing, augmentation, training, and evaluation.
- Applied hyperparameter tuning and optimization techniques to achieve high classification accuracy.

Skills: Python · TensorFlow · Keras · CNN · Deep Learning · Computer Vision · Image Processing

AI-Powered Code Debugging Chatbot

- Developed a full-stack AI chatbot that analyzes, identifies, and resolves code errors across multiple programming languages.
- Built with React (frontend), FastAPI (backend), and LLM integration via Ollama; features root cause analysis, AI-generated fixes, and beginner-friendly explanations.
- Implemented session-based conversations, real-time debugging assistance, and a scalable industrial-level workflow.

Skills: Python · FastAPI · React · LLM / AI Integration · Prompt Engineering · PostgreSQL/SQLite · Full Stack

Flood Prediction System using Hydrological, Meteorological, and Historical Data

- Engineered an ML pipeline integrating hydrological, meteorological, and historical flood data to predict flood risk with high accuracy.
- Analyzed rainfall, water level, humidity, and climate conditions to identify key flood risk indicators.
- Performed data preprocessing, predictive analysis, and visualization using Python and ML techniques.
- Focused on improving early flood prediction accuracy to support disaster management and emergency response systems.

Skills: Python · Machine Learning · Data Analysis · Predictive Modeling · Data Visualization · Environmental Data Processing

CERTIFICATIONS

- Data Analytics Virtual Internship – Tata Group (Forage) — Data cleaning, analysis, and visualization for business insights.
- Software Engineering Job Simulation – JPMorgan Chase & Co. (Forage) — Software development workflows and financial systems.
- Deep Learning Frameworks and Tools — ML and deep learning model implementation using modern frameworks.
- AWS Academy Cloud Foundations — Cloud computing fundamentals, services, and security.
- Market Research and Analysis – IIT — Market data analysis and strategic decision-making.
- Web Development Certification (HTML & CSS) — Structured layout and responsive web page design.
- On boarding an internship at Gradtwins – Under Machine learning and Various problem solving in Real World scenarios

WORKSHOPS & ACCOMPLISHMENTS

- Ideathon on Drone Technology – Won 1st prize for an innovative UAV-based solution to a real-world challenge.
- Android Development Workshop (Perfect Learning) – Completed full capstone project covering app design and deployment.
- AR/VR Workshop, Coimbatore Institute of Technology – Developed immersive models from real-world environment capture.
- Drone Workshop, Vimaana Aero – Hands-on training in UAV systems, flight mechanics, and real-time operation.
- Cybersecurity & "The Age of AI" Seminar, Anna University (2024) – Insights into AI trends and data protection.

ADDITIONAL INFORMATION

Languages: English (Fluent) | Tamil (Native)

Nationality: Indian
