

SHAKTHI SIVAPRAKASH S

Data Analyst & AI/ML Specialist

+91 9342919614 | shakthisivaprakash.s09@gmail.com | [Linkedin](#) | [GitHub](#) | [Portfolio](#) | Chennai, Tamil Nadu

PROFESSIONAL SUMMARY

AI and Data Science graduate (CGPA 8.99/10) with hands-on experience in data processing, quality assurance, and analytics across 4+ business domains. Built ML-driven data pipelines and full-stack AI applications using Python, SQL, Power BI, and Tableau, achieving 90%+ model accuracy across 3 projects. Reduced reporting turnaround time by 30% by redesigning analytical workflows and delivered data-driven recommendations to executive stakeholders. Seeking a Data Analyst or AI/ML role where applied analytical skills and engineering precision translate into measurable business results.

EDUCATION

B. Tech – Artificial Intelligence & Data Science | Sri Venkateswaraa College of Technology, Sriperumbudur 2022 – 2026

CGPA: 8.99 / 10 | 240 ECTS | EQF Level 6 Equivalent

Relevant Coursework: Data Analytics, Machine Learning, Statistics, Data Structures, Artificial Intelligence

TECHNICAL SKILLS

Data & Analytics:	Data Cleaning, Statistical Analysis, Data Visualization, Power BI, Tableau, Excel
Languages & Tools:	Python (Pandas, NumPy), SQL (PostgreSQL/SQLite), Git, AWS Cloud, MS Office 365
AI / ML:	Machine Learning, Deep Learning, CNN, Computer Vision, LLM Integration, Prompt Engineering
Frameworks:	FastAPI, React, TensorFlow, Keras, HTML/CSS
Productivity:	SharePoint, Excel (Advanced), Copilot, MS Office Suite

EXPERIENCE

Data Analytics Virtual Intern — Tata Group (Forage) Virtual | 2024 - 25

- Analyzed datasets across 4+ business domains, extracting trends that informed stakeholder decisions across 3 reporting cycles.
- Built interactive Power BI and Tableau dashboards consolidating data from 5+ sources, cutting executive report preparation time by 25%.
- Mined trends from 10+ structured and unstructured data sources; redesigned reporting workflows to reduce turnaround time by 30%.
- Maintained end-to-end documentation and audit trails across all research deliverables, ensuring full traceability and regulatory compliance.

Machine Learning Intern — Gradtwinn Chennai | 2026

- Applied supervised and unsupervised ML techniques to 3+ real-world datasets, improving model prediction accuracy by ~15% through iterative feature engineering and tuning.
- Executed structured data science projects covering research, statistical analysis, and model refinement, delivering measurable accuracy benchmarks for production readiness.

PROJECTS

Flood Prediction System — End-to-End ML Pipeline on Environmental & Historical Data Python | ML | SQL | 2026

- Machine Learning · Data Analysis · Predictive Modeling · Data Visualization · SQL
- Engineered an end-to-end ML pipeline integrating 3 data source types (hydrological, meteorological, historical flood records) to predict flood risk with 92% accuracy, enabling disaster-management teams to act on early-warning signals.
 - Processed and cleaned 5,000+ multi-source environmental records (rainfall, water levels, humidity, climate conditions), identifying key risk indicators through statistical analysis.
 - Built decision-support dashboards in Python that reduced manual analysis time by ~30%, enabling faster response workflows.

AI-Powered Code Debugging Chatbot — Full-Stack AI Application Python | FastAPI | React | 2026

- FastAPI · React · LLM Integration · PostgreSQL/SQLite · Full Stack
- Architected a full-stack AI application with React (frontend), FastAPI (backend), and PostgreSQL/SQLite, achieving 100% session-data persistence across 3 integrated technology layers.
 - Integrated LLM capabilities for root-cause analysis and automated fix generation, reducing manual debugging steps by ~80% during testing.
 - Implemented real-time data processing with auditability controls, ensuring complete data integrity and traceability across all user sessions.

Dog vs. Cat Image Classifier — CNN on 20,000+ Images Python | TensorFlow | Keras

TensorFlow · Keras · CNN · Deep Learning · Data Processing

- Trained a CNN model from scratch on a 20,000-image dataset, applying preprocessing, augmentation, and hyperparameter tuning to achieve 94% classification accuracy.
- Conducted systematic evaluation across 5+ model configurations, demonstrating a rigorous approach to large-scale data quality and performance benchmarking.

CERTIFICATIONS & TRAINING

Data Analytics Virtual Internship – Tata Group (Forage): Data cleaning, statistical analysis, and data visualization for business insights.

Software Engineering Job Simulation – JPMorgan Chase & Co. (Forage): Financial systems workflows and software development best practices.

Deep Learning Frameworks and Tools: ML and deep learning model implementation using TensorFlow and Keras.

AWS Academy Cloud Foundations: Cloud computing fundamentals, AWS services, and security principles.

Market Research and Analysis – IIT: Market data analysis and strategic decision-making frameworks.

Web Development Certification: HTML, CSS, and responsive design fundamentals.

WORKSHOPS & ACCOMPLISHMENTS

- Ideathon on Drone Technology – 1st Prize among 50+ competing teams for an innovative UAV-based solution.
- Cybersecurity & The Age of AI Seminar, Anna University (2024): AI trends and data protection strategies.
- Android Development Workshop (Perfect Learning): completed full capstone project covering app design and deployment.
- AR/VR Workshop, Coimbatore Institute of Technology: immersive model development using AR/VR toolkits.
- Drone Workshop, Vimaana Aero: UAV systems, flight mechanics, and real-time operation training.

ADDITIONAL INFORMATION

Languages: English (Fluent), Tamil (Native)
